NEW QUESTION: 1

By default, which access rule is applied inbound to the inside interface?

- A. All IP traffic is denied.
- B. All IP traffic sourced from any source to any more secure network destinations is permitted
- C. All IP traffic sourced from any source to any less secure network destinations is permitted.
- D. All IP traffic is permitted.

Answer: C

Explanation:

http://www.cisco.com/en/US/docs/security/asa/asa84/configuration/guide/access_rules.html#wp10_83496 Implicit Permits For routed mode, the following types of traffic are allowed through by default:

IPv4 traffic from a higher security interface to a lower security interface.

IPv6 traffic from a higher security interface to a lower security interface.

Note These defaults might not be true if you have configured a global access rule.

For transparent mode, the following types of traffic are allowed through by default:

IPv4 traffic from a higher security interface to a lower security interface.

IPv6 traffic from a higher security interface to a lower security interface.

ARPs in both directions
