When you pay for our 352-001 training material, the coupon will save you lots of money, But it never happens when using our high pass-rate 352-001 guide torrent, there are free demo versions available of 352-001 exam prep in our website, you can try out our product before you pay for it, no money will be charged in the try-out version.

Just spend 20 to 30 hours on the 352-001 exam pdf dumps each, then you can succeed in the test, You can spend less time and money for attending 352-001 test certification.

There are many advantages of our Cisco 352-001 Reliable Braindumps study tool, Cisco 352-001 Certification Exam preparation within a week!

NEW QUESTION: 1

You are developing a mobile instant messaging app for a company.

The mobile app must meet the following requirements:

- * Support offline data sync.
- * Update the latest messages during normal sync cycles.

You need to implement Offline Data Sync.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A.** Retrieve records from Offline Data Sync using an Incremental Sync.
- B.** Push records to Offline Data Sync using an Incremental Sync.
- C.** Return the updatedAt column from the Mobile Service Backend and implement sorting by the message id.

D. Retrieve records from Offline Data Sync on every call to the PullAsync method.

E. Return the updatedAt column from the Mobile Service Backend and implement sorting by using the column.

Answer: A,C

Explanation:

Explanation

B: Incremental Sync: the first parameter to the pull operation is a query name that is used only on the client. If you use a non-null query name, the Azure Mobile SDK performs an incremental sync. Each time a pull operation returns a set of results, the latest updatedAt timestamp from that result set is stored in the SDK local system tables. Subsequent pull operations retrieve only records after that timestamp.

E (not D): To use incremental sync, your server must return meaningful updatedAt values and must also support sorting by this field. However, since the SDK adds its own sort on the updatedAt field, you cannot use a pull query that has its own orderBy clause.
