NEW QUESTION: 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 for Customer Service administrator for Contoso, Ltd. A user named Elizabeth Rice signs in to Dynamics 365 by using the following sign in name:

[\[email protected\]](#)

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history.

Solution: Change Elisabeth's username in the user record from Dynamics 365.

Does the solution meet the goal?

A. Yes

B. No

Answer: A

Explanation:

<https://support.microsoft.com/en-us/help/930853/how-to-change-the-user-name-and-the-logon-name-for-a-user-record-in-mi>

NEW QUESTION: 2

Which type of exceptions is qualified as no predefined Oracle server errors?

- A. the exceptions that are raised implicitly by the Oracle server and can be caught by the exception handler
- B. an exception that the developer determines as abnormal, are in the declarative section and raised explicitly
- C. the exceptions that are explicitly raised by the program and can be caught by the exception handler
- D. an exception that is raised automatically when the PL/SQL program violates a database rule or exceeds a system-dependent limit

Answer: B

NEW QUESTION: 3

An Alexa Skill Builder is developing a skill containing a multi-turn dialog that can be invoked with or without a specific intent request. On invocation, the skill needs to retrieve persistent attributes that have been saved by a previous invocation, and then copy them into session attributes.

How should the Builder implement this functionality?

- A. Place logic within the skill's `SessionEndedRequest` handler to copy the persistent attributes into the session attributes.
- B. Include logic within the `LaunchRequest` handler to retrieve persistent attributes and copy them into session attributes.
- C. Implement `RequestInterceptor` containing logic which for new sessions, retrieves persistent attributes and copies them into session attributes
- D. Implement `ResponseInterceptor` containing logic that takes the current persistent attributes and copies them into session attributes.

Answer: A
