You still have enough time to work and relax, Meanwhile, the 500-101 guide torrent materials achieve your dream.

NEW QUESTION: 1

A network engineer is trying to implement broadcast-based NTP in a network and executes the ntp broadcast client command. Assuming that an NTP server is already set up, what is the result of the command?

- A. It enables a device to receive NTP broadcast and unicast packets.
- B. It enables receiving NTP broadcasts on all interfaces globally.
- C. It enables receiving NTP broadcasts on the interface where

the command was executed.

D. It enables a device to be an NTP peer to another device.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

The NTP service can be activated by entering any ntp command. When you use the ntp broadcast client command, the NTP service is activated (if it has not already been activated) and the device is configured to receive NTP broadcast packets on a specified interface simultaneously.

NEW QUESTION: 2

A. Share and Storage Management

B. New-StoragePool

C. Diskpart

D. New-VirtualDisk

Answer: C

NEW QUESTION: 3

The security term that is concerned with the same primary key existing at

different classification levels in the same database is:

A. Inheritance.

B. Polyinstantiation.

C. Polymorphism.

D. Normalization.

Answer: B

Explanation:

The security term that is concerned with the same primary key existing at different classification levels in the same database is polyinstantiation.

Answer Polymorphism is incorrect because polymorphism is defined as objects of many different classes that are related by some common superclass; thus, any object denoted by this name is able to respond to some common set of operations in a different way. Answer Normalization is incorrect because normalization refers to removing redundant or incorrect data from a database. Answer Inheritance is incorrect because inheritance refers to methods from a class inherited by another subclass.
