We offer you a free live customer support for a smooth and stress free 8007 exam preparation.

NEW QUESTION: 1

The SDN Controller can manage both hardware and software.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION: 2

- A. .cmd
- B. .bat
- C. .ps1
- D. .xml

Answer: C

Explanation:

The View Script button is used to view the corresponding PowerShell script The PowerShell script extension is .ps1. The Answer could logically be either a .cmd file or a .bat file.

According to <http://www.fileinfo.com/>:

PAL - Settings file created by Corel Painter or Palette of colors used by Dr. Halo bitmap images
BAT - DOS batch file used to execute commands with the Windows Command Prompt (cmd.exe); contains a series of line commands that typically might be entered at the DOS command prompt; most commonly used to start programs and run maintenance utilities within Windows.

XML - XML (Extensible Markup Language) data file that uses tags to define objects and object attributes; formatted much like an .HTML document, but uses custom tags to define objects and the data within each object; can be thought of as a text-based database.

CMD - Batch file that contains a series of commands executed in order; introduced with Windows NT, but can be run by DOS or Windows NT systems; similar to a .BAT file, but is run by CMD.EXE instead of COMMAND.COM.

NEW QUESTION: 3

The primary impact on the value of a sinking fund preferred stock results from the fact that redemption creates a finite stream of income to the investor plus .

- A. A terminal value versus a theoretically infinite stream of income available to the non-sinking fund preferred stockholder.
- B. A negative value versus a theoretically infinite stream of income available to the non-sinking fund preferred stockholder.
- C. A terminal value versus a theoretically finite stream of income available to the non-sinking fund preferred stockholder.
- D. A positive value versus a theoretically finite earning available to the non-sinking fund preferred stockholder.

Answer: A

NEW QUESTION: 4

You are the project manager of the GHG project. You are preparing for the quantitative risk analysis process. You are using organizational process assets to help you complete the quantitative risk analysis process. Which one of the following is NOT a valid reason to utilize organizational process assets as a part of the quantitative risk analysis process?

- A. You will use organizational process assets for risk databases that may be available from industry sources.
