Maybe you want to keep our AD0-E117 Exam Answers exam guide available on your phone.

NEW QUESTION: 1

Which Practice includes management of workarounds and known errors?

- A. Problem management
- B. Monitoring and event management
- C. Service configuration management
- D. Incident management

What is problem management?

The purpose of problem management is to reduce the likelihood and impact of incidents by identifying actual and potential causes of incidents, and managing workarounds and known errors.

Problems are related to incidents, but it is important to differentiate them in the way they are managed:

Incidents have an impact on users or business processes, and must be resolved so that normal business activity can take place.

Problems are the causes of incidents therefore they require investigation and analysis to identify the causes, develop workarounds, and recommend longer-term resolution. This reduces the number and impact of future incidents.

Answer: A

NEW QUESTION: 2

When developing a security architecture, which of the following steps should be executed FIRST?

- A. Specifying an access control methodology
- B. Defining a security policy
- C. Developing security procedures
- D. Defining roles and responsibilities

Answer: B

Explanation:

Defining a security policy for information and related technology is the first step toward building a security architecture. A security policy communicates a coherent security standard to users, management and technical staff. Security policies will often set the stage in terms of what tools and procedures are needed for an organization. The other choices should be executed only after defining a security policy.

NEW QUESTION: 3

Which two statements describe Ethernet and vEthernet port profiles? (Choose two.)

- A. vEthernet port profiles are assigned to physical interfaces such as vmnics.

Ethernet port profiles are assigned to virtual interfaces such as vNIC, vmk, or VTEP.

- B. Ethernet port profiles may only be assigned to Cisco UCS unified ports when configured as type link.

- C. Ethernet port profiles are assigned to physical interfaces such as vmnics.

vEthernet port profiles are assigned to virtual interfaces such as vNIC, vmk, or VTEP.

- D. An MTU change is required on the Ethernet port profiles to support jumbo frames.

Answer: C,D

NEW QUESTION: 4

Which one is the right way to import a local module names consul?

- A. `module "consul" { source = "module/consul" }`
- B. `module "consul" { source = "../consul" }`
- C. `module "consul" { source = "consul" }`
- D. `module "consul" { source = "./consul" }`

Answer: B,D

Explanation:

A local path must begin with either `./` or `../` to indicate that a local path is intended, to distinguish from a module registry address.

```
module "consul" {  
  source = "../consul"  
}
```
