NEW QUESTION: 3

The project schedule is falling behind and the project manager observes that the project team seems to be spending the majority of their time writing documentation instead of performing project tasks. What should the project manager do to help ensure that the team focuses on project tasks?

- A. Coach the project team to complete the project documentation activities
- B. Review and adapt the appropriate project artifacts.
- C. Save all documentation activities until the end of the project
- D. Assign a team member to handle the documentation activities.

Answer: B

NEW QUESTION: 4

You are creating a Dynamics 365 Finance and Operations report. You cannot query the data for the report directly.

You must include parameters to specify data for the report.

You need to create the report.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Data contract class

A data contract class defines the parameters for a report that is bound to a report data provider (RDP) class.

You can specify one or more groups of report parameters, the order of the groups, and the order in which the report parameters appear in a print dialog box.

Box 2: Report data provider class

Report data provider class - processes business logic based on parameters and a query, and then returns the tables as a dataset for the report.

Box 3: DataContractAttribute

DataContractAttribute - This attribute is applied to an X++ class and specifies that the class can be used as a data contract (that it should be serialized).

Box 4: DataMemberAttribute

DataMemberAttribute - This attribute is applied to a parm (parameter) method on an X++ data contract class and specifies that the data member should be serialized.

Box 5: SRSReportParameterAttribute

You set the SRSReportParameterAttribute attribute to the data contract you created for the RDP class.
