NEW QUESTION: 1

Universal Containers would like to show different picklist values to different groups of user in a custom picklist field. What should be configured?

- A. Record Types
- B. Page Layouts
- C. Permission sets
- D. Field-level security

Answer: A

NEW QUESTION: 2

You have set up an IAM policy for your users to access Elastic Load Balancers and you know that an IAM policy is a JSON document that consists of one or more statements. Which of the following elements is not a part of the statement in an IAM policy document?

- A. Resource
- B. Effect
- C. Action
- D. Key

Answer: D

Explanation:

Explanation

When you attach a policy to a user or group of users to control access to your load balancer, it allows or denies the users permission to perform the specified tasks on the specified resources.

An IAM policy is a JSON document that consists of one or more statements. Each statement is structured as follows:

Effect: The effect can be Allow or Deny. By default, IAM users don't have permission to use resources and API actions, so all requests are denied. An explicit allow overrides the default. An explicit deny overrides any allows.

Action: The action is the specific API action for which you are granting or denying permission.

Resource: The resource that's affected by the action. With many Elastic Load Balancing API actions, you can restrict the permissions granted or denied to a specific load balancer by specifying its Amazon Resource Name (ARN) in this statement. Otherwise, you can use the * wildcard to specify all of your load balancers.

Condition: You can optionally use conditions to control when your policies in effect.

NEW QUESTION: 3

Which two inputs are required to define a spoke server with the IBM Tivoli Storage Manager V7.1 Operations Center?

- A. Hub server address
- B. System admin password
- C. Spoke server communication method
- D. Spoke server address
- E. Hub server port

Answer: D,E

Explanation:

The V7.1 Operations Center can manage a mix of servers that run Tivoli Storage Manager V7.1 and V6.3.4 or later. The only requirement is that the hub server needs to be updated to V7.1. Once the hub server is at V7.1, the spoke servers can be a mix of other V7.1 servers or V6.3.4 or later servers.
