NEW QUESTION: 1

You manage a financial computation data analysis process.

Microsoft Azure virtual machines (VMs) run the process in daily

jobs, and store the results in virtual hard drives (VHDs.) The VMs product results using data from the previous day and store the results in a snapshot of the VHD.

When a new month begins, a process creates a new VHD.

You must implement the following data retention requirements:

- * Daily results must be kept for 90 days

- * Data for the current year must be available for weekly reports

- * Data from the previous 10 years must be stored for auditing purposes

- * Data required for an audit must be produced within 10 days of a request.

You need to enforce the data retention requirements while minimizing cost.

How should you configure the lifecycle policy? To answer, drag the appropriate JSON segments to the correct locations. Each JSON segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer :
