#### **NEW QUESTION: 1**

You have a server named Server1 that runs Windows Server 2016. Server1 is a Hyper-V host that hosts a virtual machine named VM1.

Server1 has three network adapter cards that are connected to virtual switches named vSwitch1, vSwitch2 and vSwitch3.

You configure NIC Teaming on VM1 as shown in the exhibit. (Click the Exhibit button.)

You need to ensure that VM1 will retain access to the network if a physical network adapter card fails on Server1.

What should you do?

- A. From Hyper-V Manager on Server1, modify the settings on VM1.
- B. From Windows PowerShell on Server1, run the Set-VmNetworkAdapterFailoverConfiguration cmdlet.
- C. From Windows PowerShell on VM1, run the

Set-VmNetworkAdapterTeamMapping cmdlet.

D. From the properties of the NIC team on VM1, add the adapter named Ethernet to the NIC team.

**Answer: D**

Install more than one operating system (multiboot)

When you install the new version of Windows, you can keep an older version of Windows on your computer. This is often called a multiboot or dual-boot configuration.

Before you begin: Make sure that your hard disk has a separate partition for each operating system that you want to install, or that your computer has multiple hard disks. Otherwise, you will either have to reformat and repartition your hard disk or install the new operating system on a separate hard disk. Also, make sure that the partition or disk where you plan to install the new version of Windows is formatted with the NTFS file system.

Turn on the computer running your current edition of Windows,

and then insert the installation disc into the computer's CD or DVD drive.

On the Install Windows menu, click Install now.

On the Get important updates for installation page, we recommend getting the latest updates to help ensure a successful installation and to help protect your computer against security threats. You must be connected to the Internet to receive installation updates. This page might not appear if your computer is not connected to the Internet.

On the Type your product key for activation page, we strongly recommend that you type your 25-character product key to help avoid problems during activation.

On the Please read the license terms page, if you accept the license terms, click I accept the license terms.

On the Which type of installation do you want? page, click Custom.

On the Where do you want to install Windows page, select the partition or disk where you want to install the new Windows operating system.

#### **NEW QUESTION: 4**

In a clustered EMC NetWorker environment, what is a function of the keyword "curphyhost"?

- A. Identifies the active client host in an active/passive cluster
- B. Keeps the NetWorker "server" file up-to-date
- C. Computes the composite Host ID for the clustered NetWorker server
- D. Ensures data is passed to the current active node of a clustered dedicated storage node

**Answer: D**
