NEW QUESTION: 2

Under Cisco IOS Software, which two features are supported in RADIUS Change of Authorization requests? (Choose two.)

- A. host termination
- B. session reauthentication
- C. session termination
- D. session identification

Answer: C,D

Explanation:

CoA requests, as described in RFC 5176, are used in a pushed model to allow for session identification, host reauthentication, and session termination. The model comprises one request (CoA-Request) and two possible response codes.

NEW QUESTION: 3

Which Cisco Unified Communications Manager deployment model for clustering over the IP WAN mandates a primary and a backup subscriber at the same site?

- A. remote failover with Cisco Unified Communications Manager Express as SRST
- B. remote failover
- C. local failover
- D. multisite with distributed call processing
- E. multisite with centralized call processing

Answer: C

Explanation:

Explanation

Clustering Over the IP WAN

You may deploy a single Unified CM cluster across multiple sites that are connected by an IP WAN with QoS features enabled. This section provides a brief overview of clustering over the WAN. For further information, refer to the chapter on Call Processing.

Clustering over the WAN can support two types of deployments:

*Local Failover Deployment Model

Local failover requires that you place the Unified CM subscriber and backup servers at the same site, with no WAN between them. This type of deployment is ideal for two to four sites with Unified CM.

*Remote Failover Deployment Model

Remote failover allows you to deploy primary and backup call processing servers split across the WAN. Using this type of deployment, you may have up to eight sites with Unified CM subscribers being backed up by Unified CM subscribers at another site.

NEW QUESTION: 4

You are evaluating a disaster recovery solution for the Front End pools.

You need to recommend the solution for restoring access to the Central Management store if a Front End pool fails.

Which Skype for Business Server 2015 cmdlet should you run?

- A. Move-CsManagementServer
- B. Invoke-CsPoolFailover
- C. Import-CsConfiguration
- D. Invoke-CsManagementServerFailover

Answer: D
