NEW QUESTION: 1

You are identifying stakeholders for your program to create new software for your organization. The software will affect the ordering by the customer, the manufacturing of the product, inventory, and account management. Sarah, a key stakeholder in your program, is skeptical of one application affecting so many parts of the organization. She prefers that several applications be created instead of the approach your program will take. In stakeholder identification how would you categorize Sarah?

- A. Negative
- B. Positive

B. AWS WAF protects your web applications and APIs from common web exploits that result in denial of service or compromise sensitive data. AWS Lambda is a serverless compute service that runs your code in response to events and automatically manages the underlying compute resources for you. Amazon CloudFront is a content delivery network (CDN) service that accelerates the delivery of static content to your end users. AWS Shield Standard is a managed service that provides protection against distributed denial of service (DDoS) attacks for Amazon EC2 instances, Amazon S3 buckets, Amazon CloudFront distributions, and Amazon Route 53 resources.

Answer: D

Explanation:

Explanation

All AWS customers benefit from the automatic protections of AWS Shield Standard, at no additional charge. AWS Shield Standard defends against most common, frequently occurring network and transport layer DDoS attacks that target your web site or applications. When you use AWS Shield Standard with Amazon CloudFront and Amazon Route 53, you receive comprehensive availability protection against all known infrastructure (Layer 3 and 4) attacks.
