**NEW QUESTION: 2**

A technician has implemented a system in which all workstations on the network will receive security updates on the same schedule. Which of the following concepts does this illustrate?

- A. Patch management
- B. Application hardening
- C. Black box testing
- D. White box testing

**Answer: A**

Explanation:

Explanation:

Patch management is the process of maintaining the latest source code for applications and operating systems by applying the latest vendor updates. This helps protect a systems from newly discovered attacks and vulnerabilities. A part of patch management is testing the effects of vendor updates on a test system before applying the updates on a production system, and scheduling updates.

**NEW QUESTION: 3**
