What is more, our HCE-5910 practice engine persists in creating a modern service oriented system and strive for providing more preferential activities for your convenience.

NEW QUESTION: 1

Developers are frustrated by the deployment delay caused by setting up permissions and firewall rules.

Which of the following would be the BEST way to resolve this issue?

A. Escalate to the change manager and reorganize the development team.

B. Automate security services through the system life cycle.

- C. Train all staff on ITIL v3 and document the service management.
- D. Outsource security services to a reputable organization.

Answer: B

NEW QUESTION: 2

Jack works as a project manager for the NHQ project. His project has a budget of \$2,208,456 and is scheduled to last for three years. His project is currently forty percent complete though it should be forty- five percent complete. In order to reach this point of the project, he has spent \$725,000. Management needs a performance report regarding the NHQ project. Management is concerned that this project will be over budget upon completion. Management would like to create a report telling them how much more the project will need to complete. What value should Jack tell the management?

- A. \$1,087,497.74
- B. \$790,988.76
- C. \$755,000.56
- D. \$1,112,978.45

Answer: A

Explanation:

Explanation/Reference:

Explanation:

The project will need \$1,087,497.74 more to complete. This formula, the estimate to complete, is estimate at completion minus the actual costs. Here, $CPI = EV/AC$

$$= (0.40 * 2,208,456) / 725,000$$

$$= 1.21846, \text{ and}$$

$$ETC = EAC - AC$$

$$= (BAC/CPI) - AC$$

$$= (2,208,456 / 1.21846) - 725,000$$

$$= 1,812,497.74 - 725,000$$

$$= 1,087,497.74$$

The estimate to complete (ETC) is the expected cost needed to complete all the remaining work for a scheduled activity, a group of activities, or the project. ETC helps project managers predict what the final cost of the project will be upon completion. The formula for the ETC is $EAC - A$ The EAC is BAC/CPI .

NEW QUESTION: 3

Which IETF standard is the most efficient messaging protocol used in an IoT network?

- A. SNMP
- B. MQTT
- C. HTTP
- D. CoAP

Answer: D
