If you decide to choose HQT-2900 actual dumps as you first study tool, it will be very possible for you to pass the exam successfully, and then you will get the related certification in a short time.

NEW QUESTION: 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You develop a software as a service (SaaS) offering to manage photographs. Users upload photos to a web service which then stores the photos in Azure Storage Blob storage. The storage account type is General-purpose V2.

When photos are uploaded, they must be processed to produce and

save a mobile-friendly version of the image. The process to produce a mobile-friendly version of the image must start in less than one minute.

You need to design the process that starts the photo processing.

Solution: Create an Azure Function app that uses the Consumption hosting model and that is triggered from the blob upload.

Does the solution meet the goal?

A. Yes

B. No

Answer: A

Explanation:

In the Consumption hosting plan, resources are added dynamically as required by your functions.

NEW QUESTION: 2

To ensure failover capabilities on an elastic network interface (ENI), what should you use for incoming traffic?

A. A secondary ENI

B. A secondary private IP

C. A secondary public IP

D. A Route53 A record

Answer: B

Explanation:

Explanation

To ensure failover capabilities on an elastic network interface (ENI), consider using a secondary private IP for incoming traffic and if a failure occurs, you can move the interface and/or secondary private IP address to a standby instance.

NEW QUESTION: 3

Ann is traveling for business and is attempting to use the hotel's wireless network to check for new messages. She selects the hotel's wireless SSID from a list of networks and successfully connects. After opening her email client and waiting a few minutes, the connection times out. Which of the following should Ann do to retrieve her email messages?

A. Open a web browser and authenticate using the captive portal for the hotel's wireless network

B. Contact the front desk and have the MAC address of her laptop added to the MAC filter on the hotel's wireless network

C. Change the authentication method for her laptop's wireless card from WEP to WPA2

D. Change the incoming email protocol from IMAP to POP3

Answer: A

NEW QUESTION: 4

A. Option B

B. Option D

C. Option C

D. Option A

Answer: A

Explanation:

Explanation: Cisco Express Forwarding uses adjacency tables to prepend Layer 2 addressing information to packets.
