NSE4_FGT-6.4 Valid Exam Duration and Fortinet NSE4_FGT-6.4 Latest Test Simulations: Fortinet NSE 4 - FortiOS 6.4 Latest Released

Sometime choice is more important than efforts, Our Exam material has [Reliable C HRHFC 2005 Exam Voucher](#) been designed and verified by the team of experts, after an in-depth analysis of Fortinet recommended material for Fortinet NSE 4 - FortiOS 6.4 exam.

So you can be rest assured the purchase of our NSE4_FGT-6.4 Exam Content exam software, We are willing to recommend you to try the NSE4_FGT-6.4 practice guide from our company.

Also you will find that most of our high-quality NSE4_FGT-6.4 Dumps PDF has 88% similarity with the real questions of real test after you purchase our real dumps, Plantasparaeljardin **NSE4_FGT-6.4 Valid Exam Duration** is an IT exam practice training provider with good reputation in IT industry.

The shortage of necessary knowledge of the exam may make you waver, while the abundance of our NSE4_FGT-6.4 study materials can boost your confidence increasingly.

We are so proud of helping our candidates go through NSE4_FGT-6.4 real exam in their first attempt quickly, If you have not any sufficient experience in test or you are taking test at your first try, our NSE4_FGT-6.4 test engine will be your good helper in the way to success.

There are so many advantages of our NSE4_FGT-6.4 guide quiz, and as long as you have a try on them, you will definitely love our exam dumps, Especially in network time, you may be confused by variety **NSE4_FGT-6.4 Valid Exam Duration** of training materials and be worried about whether you can pass the Fortinet NSE 4 - FortiOS 6.4 exam test.

First of all, we have brought in the most excellent staff to develop the NSE4_FGT-6.4 practice test, Our NSE4_FGT-6.4 exam braindumps are unlike other exam materials that are available on the market.

Then the skills you have learnt in our Fortinet **NSE4_FGT-6.4 Valid Exam Duration** Fortinet NSE 4 - FortiOS 6.4 practice

material will help you accomplish the task excellently.

NEW QUESTION: 1

Scenario

Please read this scenario prior to answering the Question Your role is consultant to the Lead Architect within a multinational semiconductor and software design company. Its largest business is in processors, although it also designs system-on-a-chip infrastructure and manufactures memory chips. A characteristic feature of its processors is their low electric power consumption, which makes them particularly suitable for use in portable devices. As well as licensing its technology, the company has several manufacturing divisions. The company has a mature enterprise architecture practice and uses TOGAF 9 for the basis of its architecture framework. In addition to the EA program, the company has a number of management frameworks in use, including business planning, portfolio/project management, and operations management. The EA program is sponsored by the CIO.

The company has defined a strategic architecture to improve its ability to meet customer demand and improve its ability to manage its supply chain. The strategic architecture called for the consolidation of multiple Enterprise Resource Planning (ERP) applications that have been operating independently in the divisions' production facilities. The goal is to replace the functionality of the existing applications with a new ERP product running as a single instance in the company's primary data center.

Each division has completed the Architecture Definition documentation required to tailor and configure the environment to meet its own specific manufacturing requirements.

The enterprise architects have analyzed the key corporate change attributes and implementation constraints. A consolidated gap analysis has been completed which has identified the gaps across the Business, Data, Application, and Technology domains. Based on the results of the gap analysis, the architects have reviewed the requirements, dependencies and interoperability requirements needed to integrate the new ERP environment into the existing environment. The architects have completed the Business Transformation Readiness Assessment started in Phase A.

Based on all of these factors they have produced a risk assessment. They have also completed the Implementation and Migration Plan v0.1, the draft Architecture Roadmap, and the Capability Assessment deliverables.

Because of the risks posed by the complexity of the current environment, it has been determined that a phased approach is needed to implement the target architectures. The overall implementation process is estimated to take several years.

Refer to the Scenario

You have been asked to recommend the next steps to prepare the final Implementation and Migration Plan.

Based on TOGAF, which of the following is the best answer?

A. You recommend that the enterprise architects place the Architecture Definition Document under configuration control. This will ensure that the architecture remains relevant and responsive to the needs of the enterprise. They should then produce an Implementation Governance Model to manage the lessons learned prior to finalizing the plan. You recommend that lessons learned be applied as changes to the architecture without review.

B. You recommend that the enterprise architects apply the Business Value Assessment Technique to prioritize the implementation projects and project increments. The assessment should focus on return on investment and performance evaluation criteria that can be used to monitor the progress of the architecture transformation. They should confirm the Transition Architecture phases using an Architecture Definition Increments Table to list the projects. They should then document the lessons learned and generate the final Implementation and Migration Plan.

C. You recommend that the enterprise architects conduct a series of Compliance Assessments to ensure that the architecture is being implemented according to the contract. The Compliance Assessment should verify that the implementation team is using the proper development methodology. It should include deployment of monitoring tools and ensure that performance targets are being met. If they are not met, then changes to performance requirements should be identified and updated in the Implementation and Migration Plan.

D. You recommend that the enterprise architects assess how the plan impacts the other frameworks in use in the organization. Minimally, the plan should be coordinated with the business planning, portfolio/project management and operations management frameworks. They should then assign a business value to each project, taking into account available resources and priorities for the projects. Finally, they should generate the Implementation and Migration Plan.

Answer: A
