NEW QUESTION: 1

DRAG DROP

Your company uses Microsoft Exchange Online. End users access their mailboxes by using Outlook Web App (OWA).

The company is deploying an end-user request process for new shared mailboxes. When a user requests a shared mailbox, a corresponding group must also be created. The requestor will manage the group membership in OWA to allow other users access to the shared mailbox.

You are creating a Windows PowerShell script to meet the following requirements:

- Create a shared mailbox that has the requested display name and email address.
- Create a group and make the requestor both the owner and a member of the group.

- Assign full control for the shared mailbox to the group.
The script currently includes the following Windows PowerShell script segment:

You need to complete the Windows PowerShell script.
How should you complete the script? To answer, drag the appropriate cmdlets to the correct targets. Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
