Our staff has tried their best to cut down **PL-200 Exam Vce Free** the costs of the study guide, We are a team of the experienced professionals.

NEW QUESTION: 1

Welche der folgenden Arten von Firewalls bieten den GRÄ-SSTEN Grad an Kontrolle und Granularität?

- A. Anwendungsgateway
- B. Circuit Gateway
- C. Paketfilter
- D. Screening-Router

Answer: A

Explanation:

Erläuterung:

Das Anwendungsgateway ähnelt einem Leitungsgateway, verfügt jedoch über spezifische Proxys für jeden Dienst. Für die Verarbeitung von Webdiensten verfügt es über einen HTTP-Proxy, der als Vermittler zwischen externen und internen Diensten fungiert, jedoch speziell für HTTP vorgesehen ist. Dies bedeutet, dass es nicht nur die Paket-IP-Adressen (Schicht 3) und die Ports überprüft, an die es gerichtet ist (in diesem Fall Port 80 oder Schicht 4), sondern auch jeden HTTP-Befehl (Schichten 5 und 7). Daher arbeitet es detaillierter (granularer) als die anderen. Screening-Router und Paketfilter (Auswahl A und B) arbeiten auf Protokoll-,

Dienst- und / oder Portebene. Dies bedeutet, dass sie Pakete von Schicht 3 und 4 und nicht von höheren Ebenen analysieren. Ein Leitungs-Gateway (Auswahl D) basiert auf Ein Proxy oder ein Programm, das als Vermittler zwischen externen und internen Zugriffen fungiert. Dies bedeutet, dass während eines externen Zugriffs keine einzelne Verbindung zum internen Server hergestellt wird, sondern zwei Verbindungen vom externen Server zum Proxy (die den Anforderungen entsprechen) Circuit-Gateway) und eine vom Proxy zum internen Server (Layer 3 und 4 (IP und TCP) sowie einige allgemeine Funktionen höherer Protokolle werden verwendet, um diese Aufgaben auszuführen.

NEW QUESTION: 2

Refer to the exhibit.

Cisco UCS Manager generates a Call Home fault report Which action do you take to resolve the issue?

- A. Verify that air flows through the chassis correctly
- B. Remove the equipment that generates excessive heat near the top of the rack
- C. Adjust the chassis temperature threshold to a higher setting
- D. Ensure that power cables are connected to the fan assemblies of the UCS

Answer: C

NEW QUESTION: 3

You have an Azure App Service app.

You need to implement tracing for the app. The tracing information must include the following:

- * Usage trends
- * AJAX call responses
- * Page load speed by browser
- * Server and browser exceptions

What should you do?

- A. Configure IIS logging in Azure Log Analytics.
- B. Configure a connection monitor in Azure Network Watcher.
- C. Enable the Azure Application Insights site extension.
- D. Configure custom logs in Azure Log Analytics.

Answer: C

Explanation:

Explanation

For web pages, Application Insights JavaScript SDK automatically collects AJAX calls as dependencies.

Note: Some of the things you can track or collect are:

What are the most popular webpages in your application, at what time of day and where is that traffic coming from?

Dependency rates or response times and failure rates to find out if there's an external service that's causing performance issues on your app, maybe a user is using a portal to get

through to your application and there are response time issues going through there for instance.

Exceptions for both server and browser information, as well as page views and load performance from the end users' side.
