i wanted to do IBM Certification certification.

NEW QUESTION: 1

Your customer has requested you to set up a Procurement Business Unit to serve the procurement needs of various Requisitioning Business Units. How would you set up the Shared Procurement model in Oracle Procurement Cloud?

- A.** by setting up a Procurement Business Unit and a Requisitioning Business Unit in the Functional Setup Manager
- B.** by setting up a Service Provider relationship in the Business Unit setup
- C.** by providing a default Business Unit in the Procurement Agent setup
- D.** by setting up the Default Procurement BU in the Requisitioning Business Function

Answer: B

Explanation:

Without the site assignment model each client BU would be forced to establish its own relationship with the supplier. The service provider relationship between the client BU and procurement BU is defined in the businessunit setup.

NEW QUESTION: 2

Which of the following does the TOGAF document describe as the risk categorization prior to determining and implementing mitigating actions?

- A. The critical level of risk
- B. The mitigated level of risk
- C. The initial level of risk
- D. The intermediate level of risk
- E. The residual level of risk

Answer: C

NEW QUESTION: 3

Which case represents a risk of renewal where a mitigation analysis will help obtain a more desired outcome?

- A. There are no open incidents 30 days before renewal dates.
- B. The health index of a customer is over expected targets with no red flags.
- C. The adoption rate is 50% under the expected level and the plan is six months before the expiration date.
- D. Customer is willing to subscribe to a recommendation case to be publicly communicated.

Answer: D

NEW QUESTION: 4

You are developing a project that contains multiple SQL Server Integration Services (SSIS) packages. The packages will be deployed to the SSIS catalog. One of the steps in each package accesses an FTP site to download data files.

You create project parameters to store the username and password that are used to access the FTP site.

You need to ensure that the username and password values are encrypted when they are deployed.

What should you do?

- A. Convert the project to the Legacy Deployment model.
- B. Convert the parameters to package parameters.
- C. Set the Sensitive property of the parameters to True.
- D. Set the ProtectionLevel property of the package to EncryptSensitiveWithPassword.

Answer: C
