Download the SuiteFoundation (NetSuite SuiteFoundation) APP practice exam and compare it with other NetSuite SuiteFoundation Exam practice tests in the market, you will understand the difference and taking a decision would become quite easier for you.

NEW QUESTION: 1

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012.

The domain contains two organizational units (OUs) named OU1 and OU2 in the root of the domain.

Two Group Policy objects (GPOs) named GPO1 and GPO2 are created. GPO1 is linked to OU1. GPO2 is linked to OU2. OU1 contains a client computer named Computer1. OU2 contains a user named User1. You need to ensure that the GPOs applied to Computer1 are applied to User1 when User1 logs on. What should you configure?

- A. GPO links
- B. Item-level targeting
- C. Security Filtering
- D. Block Inheritance

Answer: A

Explanation:

A GPO can be associated (linked) to one or more Active Directory containers, such as a site, domain, or organizational unit. Multiple containers can be linked to the same GPO, and a single container can have more than one GPO linked to it. If multiple GPOs are linked to one container, you can prioritize the order in which GPOs are applied. Linking GPOs to Active Directory containers enables an administrator to implement Group Policy settings for a broad or narrow portion of the organization, as required.

NEW QUESTION: 2

A company can determine if its _____ objective has been met by evaluating its ability to pay bills when due and meet unexpected needs for cash.

- A. long-term solvency.
- B. liquidity.
- C. profitability.

Answer: B
